ERMENEGILDO ZEGNA ACCESSORIES SPRING-SUMMER 2005

Innovations and pleasant recurrences for Ermenegildo Zegna's shoes and leather accessories.

The choice to propose three shoe models in a formula that is very close to Tailor Made, is exclusive: starting from September, Rome and London boutiques will offer the possibility to order Oxford, Derby and loafers choosing leather, colour and lining so as to have a customized shoe even with the client's initials printed inside the shoe.

The High Performance **Limited Edition**. Is renewed this season by a much slim form and a more aggressive palette of colours, still hand made in Goodyear manufacture and in only 999 pieces with precious leathers such as ostrich's and with silver clamps, wooden pins, and a high class packaging: box in the same leather, cleansing kit, shoehorn, Nappa sachet, exclusively designed for each model.

For the "mass-production", the evolution of shapes must be pointed out: more slender, decorated by aggressive looking fretwork and buckles; whilst the more sportive models, like loafers, are inclined to total comfort. De-structured, in leathers manufactured so as to obtain the maximum softness, with perfectly ergonomic soles.

ZZegna's guide model is slipper-like, in split leather. Flip flops also find their way, in fabric and laced in brushed calfskin with a contemporary allure.

Bags complete Ermenegildo Zegna's accessories universe: trolleys in technical fibres and double-material shoulder bags, in Nappa leather and fabric - dress bags and attaché in very soft Nappa leather with extra-luxury lining- foldable bags in waterproof fabric are only some of the many facets of an overall style.
