

Collection Fall Winter 2006/2007

The 2006-2007 Autumn-Winter ZEGNA SPORT collection perfectly combines the essence of **quality** with **comfort**. A must-have for a man who likes playing sport and is sophisticated, elegant and demanding when enjoying his leisure time. Be it when playing golf, sailing, taking a leisure trip, hiking or simply enjoying a moment of total relaxation, the ZEGNA SPORT man is always very careful to find the perfect balance between a **sportive** and a **luxury** look. The collection is indeed designed for a man who praises the **design** of a garment, its **performance** as well as the intrinsic value of each piece of clothing.

Urban Golf, the new way of playing golf by a young generation of golfers who like playing in the city is one of the top moods of the ZEGNA SPORT collection. A brand new approach to golf as a sport played by a younger, more avantgarde man who treasures both tradition and its development in the future as well as a mental approach requiring concentration and a perfect understanding of nature and its many facets, including the more urban one.

The top elements of the ZEGNA SPORT world are the engineered fabrics, like *Aqualite*, used for both reversible and non-reversible jackets with hyper-sportive neoprene details. The superlight *Microtech* blouson, an evolution of *Aqualite*, is lined with a thermal-regulating engineered fabric. All fabrics guarantee an excellent level of performance.

Performance is also key for the garments of the collection that are more inspired by the concept of **Sport Design**. Engineered fabrics and strikingly bright colours are the two key features: brown and red, black and bright yellow are the impactful colours of the caban. The *Equator Jacket*, an overjacket with an outside texture of antistatic metal wire and thermally tapered stitching: the ideal garment to feel comfortable in all weather conditions. The fabric breaths perfectly and its details, such as the hood collar, adjustable cuffs, the inner pocket for the i-pod and the detachable key-holder, make it an icon garment.

Engineered materials and new designs also for the ZEGNA SPORT shoes collection: "Racer", the double colour, double material, leather and suede sneakers turn more wintry raised to the ankles. "Grip", the suede sneakers, have a more aggressive line with contrast colours and match the sport bag made in engineered material. "Portofino", the Zegna Sport all timers, take on a fresh look with winter suede, inner shell in engineered net and a new decorative finishing on the laces. "Sprinter", the sneakers with velcro, have the logo on the tongue and a sole with a special shape up the sides making them look super sportive.
